

Manitoba School Counselors Association (MSCA) and Manitoba Association of Resource Teachers (MART) Collaborate to Bring you this Awesome SAG Event

Engaging the Brain - How to Maximize Every Learner's Potential!

Friday, October 22, 2010, Holy Eucharist Parish Center, 460 Munroe Avenue, Winnipeg, Manitoba

Extra parking is available across the street at Polson School.
Registration opens at 8:15 a.m.

Keynote Speaker: Terry Small, B. Ed., M.A.

MART and MSCA welcome Terry Small, a master teacher and learning skills specialist. He has taught for 28 years at elementary school, high school and university levels. His knowledge, warmth, humour and dynamic presentation style have made him a much sought after speaker at workshops and conferences. Terry has been on television, the radio and in the press. He has presented his ideas to over 180 000 people. These ideas were recently featured on CTV, Global, BCTV, CKNW and in Student Success. His sessions are described as practical, fun, and provoking. Terry believes success is a skill anyone can learn.

The session will be of strong interest to counsellors. The main focus of the day will be on Brain Engagement Principles, why the brain pays attention, gets stuck, thinks, works, etc.

Research has a great deal to say about the brain and learning! It is possible to help students learn faster and remember more ... and have more fun.

"Life is 10% of what happens to me and 90% how I react to it." Counsellors, resource teachers & educators will learn how to help their students be more successful by learning how the brain works and how to engage the learner. You will learn how to extend your skills, knowledge, and experience so that your students can build confidence, academic achievement, and self-esteem. Access new tools and ideas to make your work more fun and reach more students! You will learn many practical tips and strategies that you can use immediately as an educator/facilitator and in your personal life.

Participants: counsellors, resource teachers, teachers, administrators, parents, clinicians

You will learn and discover:

- how the brain processes information
- the best way for students to take notes.
- why state and strategy are just as important as content.
- the top 10 Brain-Learning Principles.
- what students report is the #1 Study Technique.
- how music affects learning.
- how to boost attention.
- how to increase the capacity of one's memory

...and much, much more!

Terry's presentation is lively, humorous, and interactive. This session will focus on skill enabling students to maximize learning potential. You will leave with new knowledge and many eye-opening ideas that will make your challenging school year more successful for both you and your students.
